FEMME FERTILE TABLETS

Item No.: 5449175

A sufficient supply of folic acid during pregnancy is essential as it contributes to maternal tissue growth during pregnancy. Supplementation with folic acid is useful even before pregnancy as it also has a role in the process of cell division and contributes to the reduction of tiredness and fatigue.

This is why we have developed our **Femme Fertile Tablets** to support mothers-to-be before and at the start of pregnancy with folic acid, other vitamins, and iodine. Vitamins B12, B2 and D also contribute to the reduction of tiredness and fatigue, while B12 and folic acid have a role in the process of cell division.

Benefits

- With folic acid
 - Folate contributes to maternal tissue growth during pregnancy
 - Folate has a role in the process of cell division
 - Folate contributes to the reduction of tiredness and fatigue
- Also contains vitamins B2, B6, B12, D, E and the mineral iodine
