SORBITOL MELATONIN LOZENGES

Item No.: 5449192 / 5449193

Melatonin tablets contain the body's own hormone, melatonin, which plays a significant role in regulating your sleep-wake cycle. A balanced sleep-wake cycle is important for giving your body enough time to recuperate. This is the only way to be productive during the day and then relax for a restful night.

However, the body's own melatonin level can be negatively affected by a variety of factors such as jet lag, stress and hormonal changes, which is why it can be helpful to support your body with melatonin tablets.

Different flavours available, e.g., apple or cherry.

Benefits

- With melatonin
 - Melatonin contributes to the reduction of time taken to fall asleep.
 - Melatonin contributes to the alleviation of subjective feelings of jet lag.
- Sweet taste thanks to the sugar substitute sorbitol
