# CARDIOVASCULAR CAPSULES

Item No.: 5449217

The cardiovascular system has the essential role of supplying the cells of the body with nutrients via the blood vessels. Carbon dioxide produced by the body is also transported to the lungs and replaced there by oxygen in the inhaled air. The oxygen is then distributed to the cells via the capillary network.

At Biohealth International, we have developed a product to support your cardiovascular system.

These **cardiovascular capsules** include the nutrients potassium, vitamin C and selenium.

Potassium contributes to the maintenance of normal blood pressure. Vitamin C contributes to normal collagen formation for the normal function of blood vessels. Selenium contributes to the protection of cells from oxidative stress.

## Benefits

- With potassium
  - Potassium contributes to the maintenance of normal blood pressure.
- With vitamin C
  - Vitamin C contributes to normal collagen formation for the normal function of blood vessels.
- With selenium
  - Selenium contributes to the protection of cells from oxidative stress.
