INNOVATIVE: CAPSULE BLISTER PACKS NOW WITHOUT PVC!

As a B2B manufacturer we are always looking at market trends. There's currently a high demand in the product sector not only for iodine capsules and tablets but also for more sustainable packaging options made from polypropylene (PP). Designed specifically for capsules and tablets, we can offer innovative blister packs and film seals from PP material that meet the highest quality requirements and replace blister packs made with aluminium and/or PVC film that are barely recyclable.

Benefits of PP material:

- Eco-friendly and aluminium-free PP-monoblister packs
- 100 % recyclable with the best barrier properties (Interseroh recycling certificate)
- Replaces aluminium and PP film seal for blister packaging
- PP sealing film that is easy to press through
- Material based on carbon/hydrogen enables both material and energetic recovery
- High transparency
- High water vapour barrier
- The film can be printed on using conventional methods

THE PERFECT PRESENTATION FOR YOUR PRIVATE LABEL PRODUCT

You already know Biohealth as a professional full-service provider for your private label products as powders, capsules, tablets and liquids.

But did you know that we also have our own graphics department and offer a whole host of design services?

... CREATIVE, INNOVATIVE AND COST-EFFECTIVE IN-HOUSE!

Every new product packaging starts with an idea – from a rough concept in your mind to the final approved packaging. Collaborating closely with you, our professional graphics department can create products such as a customised blister pack from recyclable PP film for your iodine capsules or tablets.

Our graphics services at a glance:

- Affordable packaging design created to your requirements of e.g. blister films, folding boxes, sachets, sleeves, sticks, stand-up pouches, labels, package inserts
- Checking the supplied graphics
- Advice on motif selection and placement
- Layout concept to your requirements
- Setting text and images
- Creating EAN or QR codes
- Declaration according to legal requirements
- Corrections / image editing / reproduction

Once you have approved the documents for printing, we are happy to send these to a printer of your choice. By collaborating closely with experienced printers, we ensure your packaging materials are created quickly and competently.

Would you like to have your packaging economically designed by Biohealth? For further questions, please contact your sales contact who will be happy to help.

IMPORTANT INFORMATION

SUPPLY AVAILABILITY

We would like to take this opportunity to advise that the war in Ukraine has exacerbated the supply situation. Furthermore, there are significant price rises and possible crop losses may cause further supply shortages.

As a company, we are also being affected by this. For this reason, please check your needs as early as possible and contact us so that we can continue to deliver in good time.

PLMA 2022

INNOVATIONS FOR HEALTH FOODS

The **World of Private Label trade show (PLMA)** will be taking place in person in Amsterdam from 31 May – 1 June 2022. Biohealth will also exhibit at the leading trade fair for private label products and showcase new products in the field of powder, capsules and tablets. The Biohealth team looks forward to welcoming you to stand F-5220 and presenting market trends and our new products. Arrange a meeting directly with our sales manager, [Simone Tückmantel](#).

If you need further information on our mentioned topics or have any suggestions, please feel free to contact us!
